

The kits ranges from 1 to 12 button panels (Larger on request), surface or flush mounting that are available in five different finishes. [Stainless steel, Aluminium (\A), White (\W), Brown (\B), Bronze (\Bz)] . The kits also include wall mountable handsets in a white finish and an AC transformer.

Operation:-

When a caller presses the call button this will produce an electronic call tone at the telephone handset. When answered, the caller and occupant can have a two way conversation. If required the occupant can then release the door/gate by pressing the release button on the telephone handset.
